 - Blue Prism Cloud 2022.1 – October 2022 6
 - Blue Prism Cloud 2022.1 – August 2022 6

Release Notes

SS&C | Blue Prism Cloud 2022.1 – March 2024

Software components

SS&C | Blue Prism Cloud 2022.1 is supplied with the following additional components:

SS&C Blue Prism Enterprise	7.3	Blue Prism 7.3 release notes Using the above link, read the release notes for Blue Prism 7.3 and all previous releases of Blue Prism version 7.
------------------------------	-----	--------------------------------------------------------------------------------------------------------------------------------------------------------------------

 For a full list of available components for Blue Prism Cloud 2022.1, see: [Your Blue Prism Cloud 2022.1 platform](#).

 By default, not all the features of these products are available on Blue Prism Cloud, specifically:

- Data Gateways is not available.
- Browser Automation Agent is installed. However, business objects will need to be updated to utilize JavaScript insert/invoke capabilities within browsers. Existing browser automations that do not use insert/invoke JavaScript capabilities will not be impacted. Following the adoption of MV3 browser extensions, in order to use the Javascript insert/invoke capabilities, the appropriate web drivers need to be installed. For more information, see the **Install the web drivers** section of the [Blue Prism Browser Automation Agent documentation](#).

Please refer to the [product roadmap on the Blue Prism Portal](#) for planned future functionality.

Upgrade notices

Version 10.3 of the Email – POP3/SMTP/IMAP VBO is currently incompatible with Blue Prism Cloud

Blue Prism Cloud customers who use the *Email - POP3/SMTP* VBO should not update the VBO to version 10.3 until further notice. Version 10.2.1 and earlier of the VBO continue to function without issue following an upgrade to Blue Prism Enterprise 7.3 on Blue Prism Cloud.

Secure development policy

Blue Prism's secure development process is a market-leading, embedded security culture, focused on delivering security excellence through four key principles:

- Education – Providing up-to-date knowledge, information, and training to the development team.
- Evaluation – Regular reviews of our products using industry standard frameworks and security tools.
- Elimination – Remove potential threats through the evaluation of standards, compliance, and performance.
- Evolution – Continued improvement of our security program, ensuring alignment with our product technologies and by reacting effectively to new and emerging threats.

Blue Prism secure development is based on OWASP ASVS, ISO 27034 and GDPR Article 25 standards and practices. For more information, see Blue Prism's [comprehensive secure development process](#).

SOC 2 certification

Blue Prism Cloud 2023.1 has been independently audited and is fully certified to SOC 2 (type II). SOC 2 (System and Organization Controls 2) is an internationally recognized compliance standard for service organizations, which specifies how organizations should control, manage, and protect customer data. The standard is based on security, availability, processing integrity, confidentiality, and privacy trust criteria. Further information can be found here: <https://soc2.co.uk>.

Previous releases

Blue Prism Cloud 2022.1 – October 2022

Blue Prism Cloud 2022.1 is now available using Amazon Web Services (AWS). For more information, see [Blue Prism Cloud hosting comparison – Azure versus AWS](#).

Blue Prism Cloud 2022.1 – August 2022

Software components

Blue Prism Cloud 2022.1 is supplied with the following components:

Blue Prism	6.10.5	Blue Prism 6.10.5 release notes Using the above link, read the release notes for Blue Prism 6.10.
Blue Prism Hub	4.6	Hub 4.6 release notes The Hub release notes also include the notes for the plugins, such as Automation Lifecycle Management (ALM) and Hub Control Room. Using the above link, read the release notes for Hub 4.6, Hub 4.5, and Hub 4.4 for all the changes since Hub 4.3.
Blue Prism Interact	4.6	Interact 4.6 release notes Using the above link, read the release notes for Interact 4.6, Interact 4.5, and Interact 4.4 for all the changes since Interact 4.3.

Blue Prism Cloud 2022.1 is supplied with Blue Prism 6.10.5. This is a change from the originally intended version of Blue Prism 7.1 due to the [current known issues](#) for this version, therefore an alternative earlier version is supplied. Blue Prism 7.x will be made available in a future release of Blue Prism Cloud.

Not all the features of these products are available on Blue Prism Cloud, such as the integration between Blue Prism with Authentication server, and the components that depend on this, such as, the web-based Control Room and the Blue Prism API. Data Gateways is also not available.

Please refer to the [product roadmap on the Blue Prism Portal](#) for planned future functionality.

Secure development policy

Blue Prism's secure development process is a market-leading, embedded security culture, focused on delivering security excellence through four key principles:

- Education – Providing up-to-date knowledge, information, and training to the development team.
- Evaluation – Regular reviews of our products using industry standard frameworks and security tools.
- Elimination – Remove potential threats through the evaluation of standards, compliance, and performance.
- Evolution – Continued improvement of our security program, ensuring alignment with our product technologies and by reacting effectively to new and emerging threats.

Blue Prism secure development is based on OWASP ASVS, ISO 27034 and GDPR Article 25 standards and practices. For more information, see Blue Prism's [comprehensive secure development process](#).
