### Release notes

#### Enhancements

The following new features and enhancements are introduced in this version of [product].

Area	Description of change
IMS	Implemented new Identity Management Server (IMS).
	New IMS 'Login' screen + new flow.
	New IMS 'Forget password' screen + new flow.
	New IMS Interact registration screen + new flow.
	New session control mechanism.
SMTP	New encryption control.
	New SMTP authentication control.
	You can now test your email configuration by sending a test email to email of the user you're logged in as.
Database	IADA URL included in 'Database' settings modal.
User, Roles and Registration Approvals	User Settings have been changed to 'Users, Roles and Registration Approvals' on the 'Settings' toggle to accommodate Interact registrations.
	Registration approval number is included within settings toggle, this will let the administrator know how many Interact users need to be reviewed.
	'User, Roles and Registration Approvals' option will be highlighted in red if the administrator has to review registered Interact users.
	Setup status column within the user table has been added to assist administrators in understanding if a user has been setup correctly.
	New Interact registration table and tab.
	New Interact registration approval/deny workflow.
Customization	You can customize the look of IMS (including Login, Forget Password and Interact Registration pages).
	You can customize the look of Interact.
Audit	Audit option included within the Settings toggle.
	New Audit table.

Area	Description of change
	The following categories will be tracked for audit reasons - User Management, SMTP Management, Role Management, Live Access, Authentication Settings, Digital Workers.
.NET Core	Migrated Hub to .NET Core 2.2.
Core	IMS and Hub supports the following languages English, French German, Japanese, Russian, Spanish, Portuguese (Brazilian) and Chinese.
