Release Notes

Automation Lifecycle Management 5.0 – July 2023

This release note is for the 5.0 release of Blue Prism® Automation Lifecycle Management.

 SS&C | Blue Prism ALM 5.0 is only available in Blue Prism Cloud – it is not available as an on-premises solution. Please refer to the [roadmap](#) for more information on the planned versions of the Blue Prism Hub platform and the plugins.

Removal of the dependency between Hub and its plugins

Version 5.0 brings a fundamental change to the relationship between the individual plugins and Blue Prism Hub. Although Blue Prism Hub will continue to host the plugins, changes have been made to remove or reduce the level of dependency, with the view to enable installing and upgrading of future plugins without the need to upgrade the whole of Hub 5.0 and the other plugins.

For more information, see the [Blue Prism Hub release notes](#).

Enhancements

Area	Description of Change	Reference
Business process	<p>The Business process plugin has been removed from ALM. As a result of this change, existing business process members have been migrated to Form members in the Interact plugin, to allow them to continue to access forms.</p> <p>Users with appropriate access can enter the business process name, and assign members to process definition documents and Interact forms using the ALM > Process definitions pages.</p>	HUB-4087 HUB-3217 HUB-3179
Independent upgrade	The Business process plugin has been removed from ALM due to the removal of the upgrade dependency between Hub and the ALM plugin.	HUB-2489
Automation lifecycle	A warning message is displayed on the Automation lifecycle page when the license has 14 days left before expiring, as well as when the license has expired.	HUB-4315
Application overview	The option to sort applications by the Owner column has been removed.	HUB-4242
	The Access and permissions page was not used in earlier versions of ALM and there are no further plans to use this functionality. As a result, the page has been removed along with the icons to switch pages, resulting in more screen space on the Application overview page for users to easily see their information.	HUB-3797 HUB-4117
Exceptions	<p>The following filter options have been updated from free text to fields where users can start typing to automatically display a list of matching options:</p> <ul style="list-style-type: none"> • Locked by • Updated by 	HUB-3926

Area	Description of Change	Reference
Process definitions	<p>The following filter options have been updated from free text to fields where users can start typing to automatically display a list of matching options:</p> <ul style="list-style-type: none"> Contributors Owners Locked by Updated by 	HUB-3926
Wireframer	<p>The following filter options have been updated from free text to fields where users can start typing to automatically display a list of matching options:</p> <ul style="list-style-type: none"> Locked by Updated by Deployed by Deployed to 	HUB-3926 HUB-3928
	<p>If a connected environment is deleted, a warning message is now displayed in the Deployed to column of each affected deployed wireframe.</p>	HUB-3923

Secure development policy

Blue Prism’s secure development process is a market-leading, embedded security culture, focused on delivering security excellence through four key principles:

- Education – Providing up-to-date knowledge, information, and training to the development team.
- Evaluation – Regular reviews of our products using industry standard frameworks and security tools.
- Elimination – Remove potential threats through the evaluation of standards, compliance, and performance.
- Evolution – Continued improvement of our security program, ensuring alignment with our product technologies and by reacting effectively to new and emerging threats.

Blue Prism secure development is based on OWASP ASVS, ISO 27034 and GDPR Article 25 standards and practices. For more information, see Blue Prism's [comprehensive secure development process](#).
