Release Notes

Director 1.0 – July 2023

This release note is for the 1.0 release of SS&C | Blue Prism® Director.

> ✎ SS&C | Blue Prism Director is only available in Blue Prism Cloud – it is not available as an on-premises solution. Please refer to the roadmap for more information on the planned versions of the Blue Prism Hub platform and the plugins.

Known issues

A list of any prominent issues with this release is maintained in the knowledge base, click here for more information.

Enhancements

SS&C | Blue Prism Director is an intelligent work and activity coordination solution. Director facilitates automated and autonomous operations of a Blue Prism digital workforce by prioritizing and orchestrating work queue items according to the item's priority, and then the associated SLA, giving you full control over how your automated operations are managed.

Director is an upgrade to IADA, which was previously available as part of Blue Prism Cloud. It builds on the success of IADA within the SS&C | Blue Prism software solution. Director is provided as a RESTful API, like other APIs in the Blue Prism solution. In Blue Prism Cloud, Blue Prism can achieve orchestration by leveraging the Director Web API service within the Blue Prism Director - Orchestrator, Collector, and Executor processes. Unlike IADA Orchestrator which relied on tags under work queue items, Director provides separate fields to specify priority, SLA, and process name. This also allows users to freely use the Status and Tag sections of each queue item.

> ✎ In Blue Prism Cloud, Blue Prism is automatically configured to use the Director Web API service. For more information, see Configure Blue Prism to use Director.
>
> You can download the Director template release file from the Digital Exchange – this includes templates for the Orchestrator, Collector, and Executor processes. For more information, see the Director user guide.

Secure development policy

Blue Prism's secure development process is a market-leading, embedded security culture, focused on delivering security excellence through four key principles:

- Education – Providing up-to-date knowledge, information, and training to the development team.
- Evaluation – Regular reviews of our products using industry standard frameworks and security tools.
- Elimination – Remove potential threats through the evaluation of standards, compliance, and performance.
- Evolution – Continued improvement of our security program, ensuring alignment with our product technologies and by reacting effectively to new and emerging threats.

Blue Prism secure development is based on OWASP ASVS, ISO 27034 and GDPR Article 25 standards and practices. For more information, see Blue Prism's comprehensive secure development process.
