## Plugin updates

A number of plugins are provided in a Blue Prism Cloud release – new and/or updated plugins are listed below.

### Updated plugins

Plugin	Description
Interact	Priority and SLA no longer required fields when creating an Interact form.

## Known issues

A table of any prominent issues with this release.

Theme	Description	Workaround
Audit	The following appear in the Audit drop-down list but display no information as the digital worker settings are not available: · Edited Digital Worker Log · Retired Virtual Worker Log · Made Live-Virtual Worker Log.	None
Interact Form Priority and SLA	Though the Priority and SLA can be set in the Interact Form creator, they have no significance in this release as IADA ‘Get Next Prioritized Item’ (GNPI) function is not available in an on-premise configuration.	None
Rules	Rules are not enforced when updating Interact Forms from Blue Prism. For example, a rule that reveals a hidden field when a flag is set, will not be initiated if the flag is set correctly when updated. If the field is not read-only a user can click in the field and then click elsewhere in the Form to see the Rule applied.	None
Verification	Regex and other verification such as character string lengths are not enforced when updating Interact Forms from Blue Prism. If the field is not read-only a user can click in the field and then click elsewhere in the Form to see the Rule applied.	None
